

Suggested start point: Littlemoor library ●

Distance: 9.5km / 6 miles

We recommend this route as a bike ride taking advantage of the traffic free cycle network alongside the Weymouth Relief Road, however it's good as a walking route too.

From Littlemoor, head in the direction of the Jurassic Roundabout and the new cycle path. Note the sculpture at the roundabout featuring unusual shaped stones known as 'doggers' found during excavations for the new road. The sides of the road are carefully managed for wildflowers - in turn home to a host of butterflies. Up and along the Ridgeway, past the site of the Viking mass grave and numerous Bronze Age round barrows. Take the track down to Bincombe where you can access the path up to Bincombe Bumps, a substantial group of barrows visible for miles around.

Facilities: Shops etc at Littlemoor, Upwey and Broadwey.

Public Transport: No. 2 to Littlemoor, No. 10 to Upwey, for details visit travelinesw.com

LEGEND

- Round Barrow
- Long Barrow
- ▭ Bank Barrow
- ◻ Limekiln
- ⊙ Quarry or Pit
- 🌳 Woodland or Coppice
- Parish boundary
- - - Public footpath or bridleway
- · - · - Walk route (off road)
- · - · - Traffic free cycle / walk route
- · - · - Quiet road cycle / walk route

- The colours on this map approximately indicate the type and age of the rock below ground - look out for features or changes in the landscape
- GRAVEL**
Deposited approximately 42 million years ago
 - CHALK**
Formed approximately 90 - 100 million years ago
 - UPPER GREENSAND**
Formed approximately 100 - 113 million years ago
 - GAULT CLAY**
Formed approximately 113 million years ago
 - WEALDON GROUP**
Formed approximately 126 - 145 million years ago
 - PURBECK LIMESTONE**
Formed approximately 140 - 145 million years ago
 - PORTLAND LIMESTONE**
Formed approximately 145 - 148 million years ago
 - KIMMERIDGE CLAY**
Formed approximately 148 - 157 million years ago
 - CORALLIAN GROUP** includes layers of clay and mud
Formed approximately 157 - 163 million years ago
 - OXFORD CLAY FORMATION**
Formed approximately 157 - 163 million years ago
 - KELLAWAYS FORMATION** Mud and Sandstone
Formed approximately 164 - 166 million years ago
 - CORNBRASH**
Formed approximately 164 - 168 million years ago

Field names

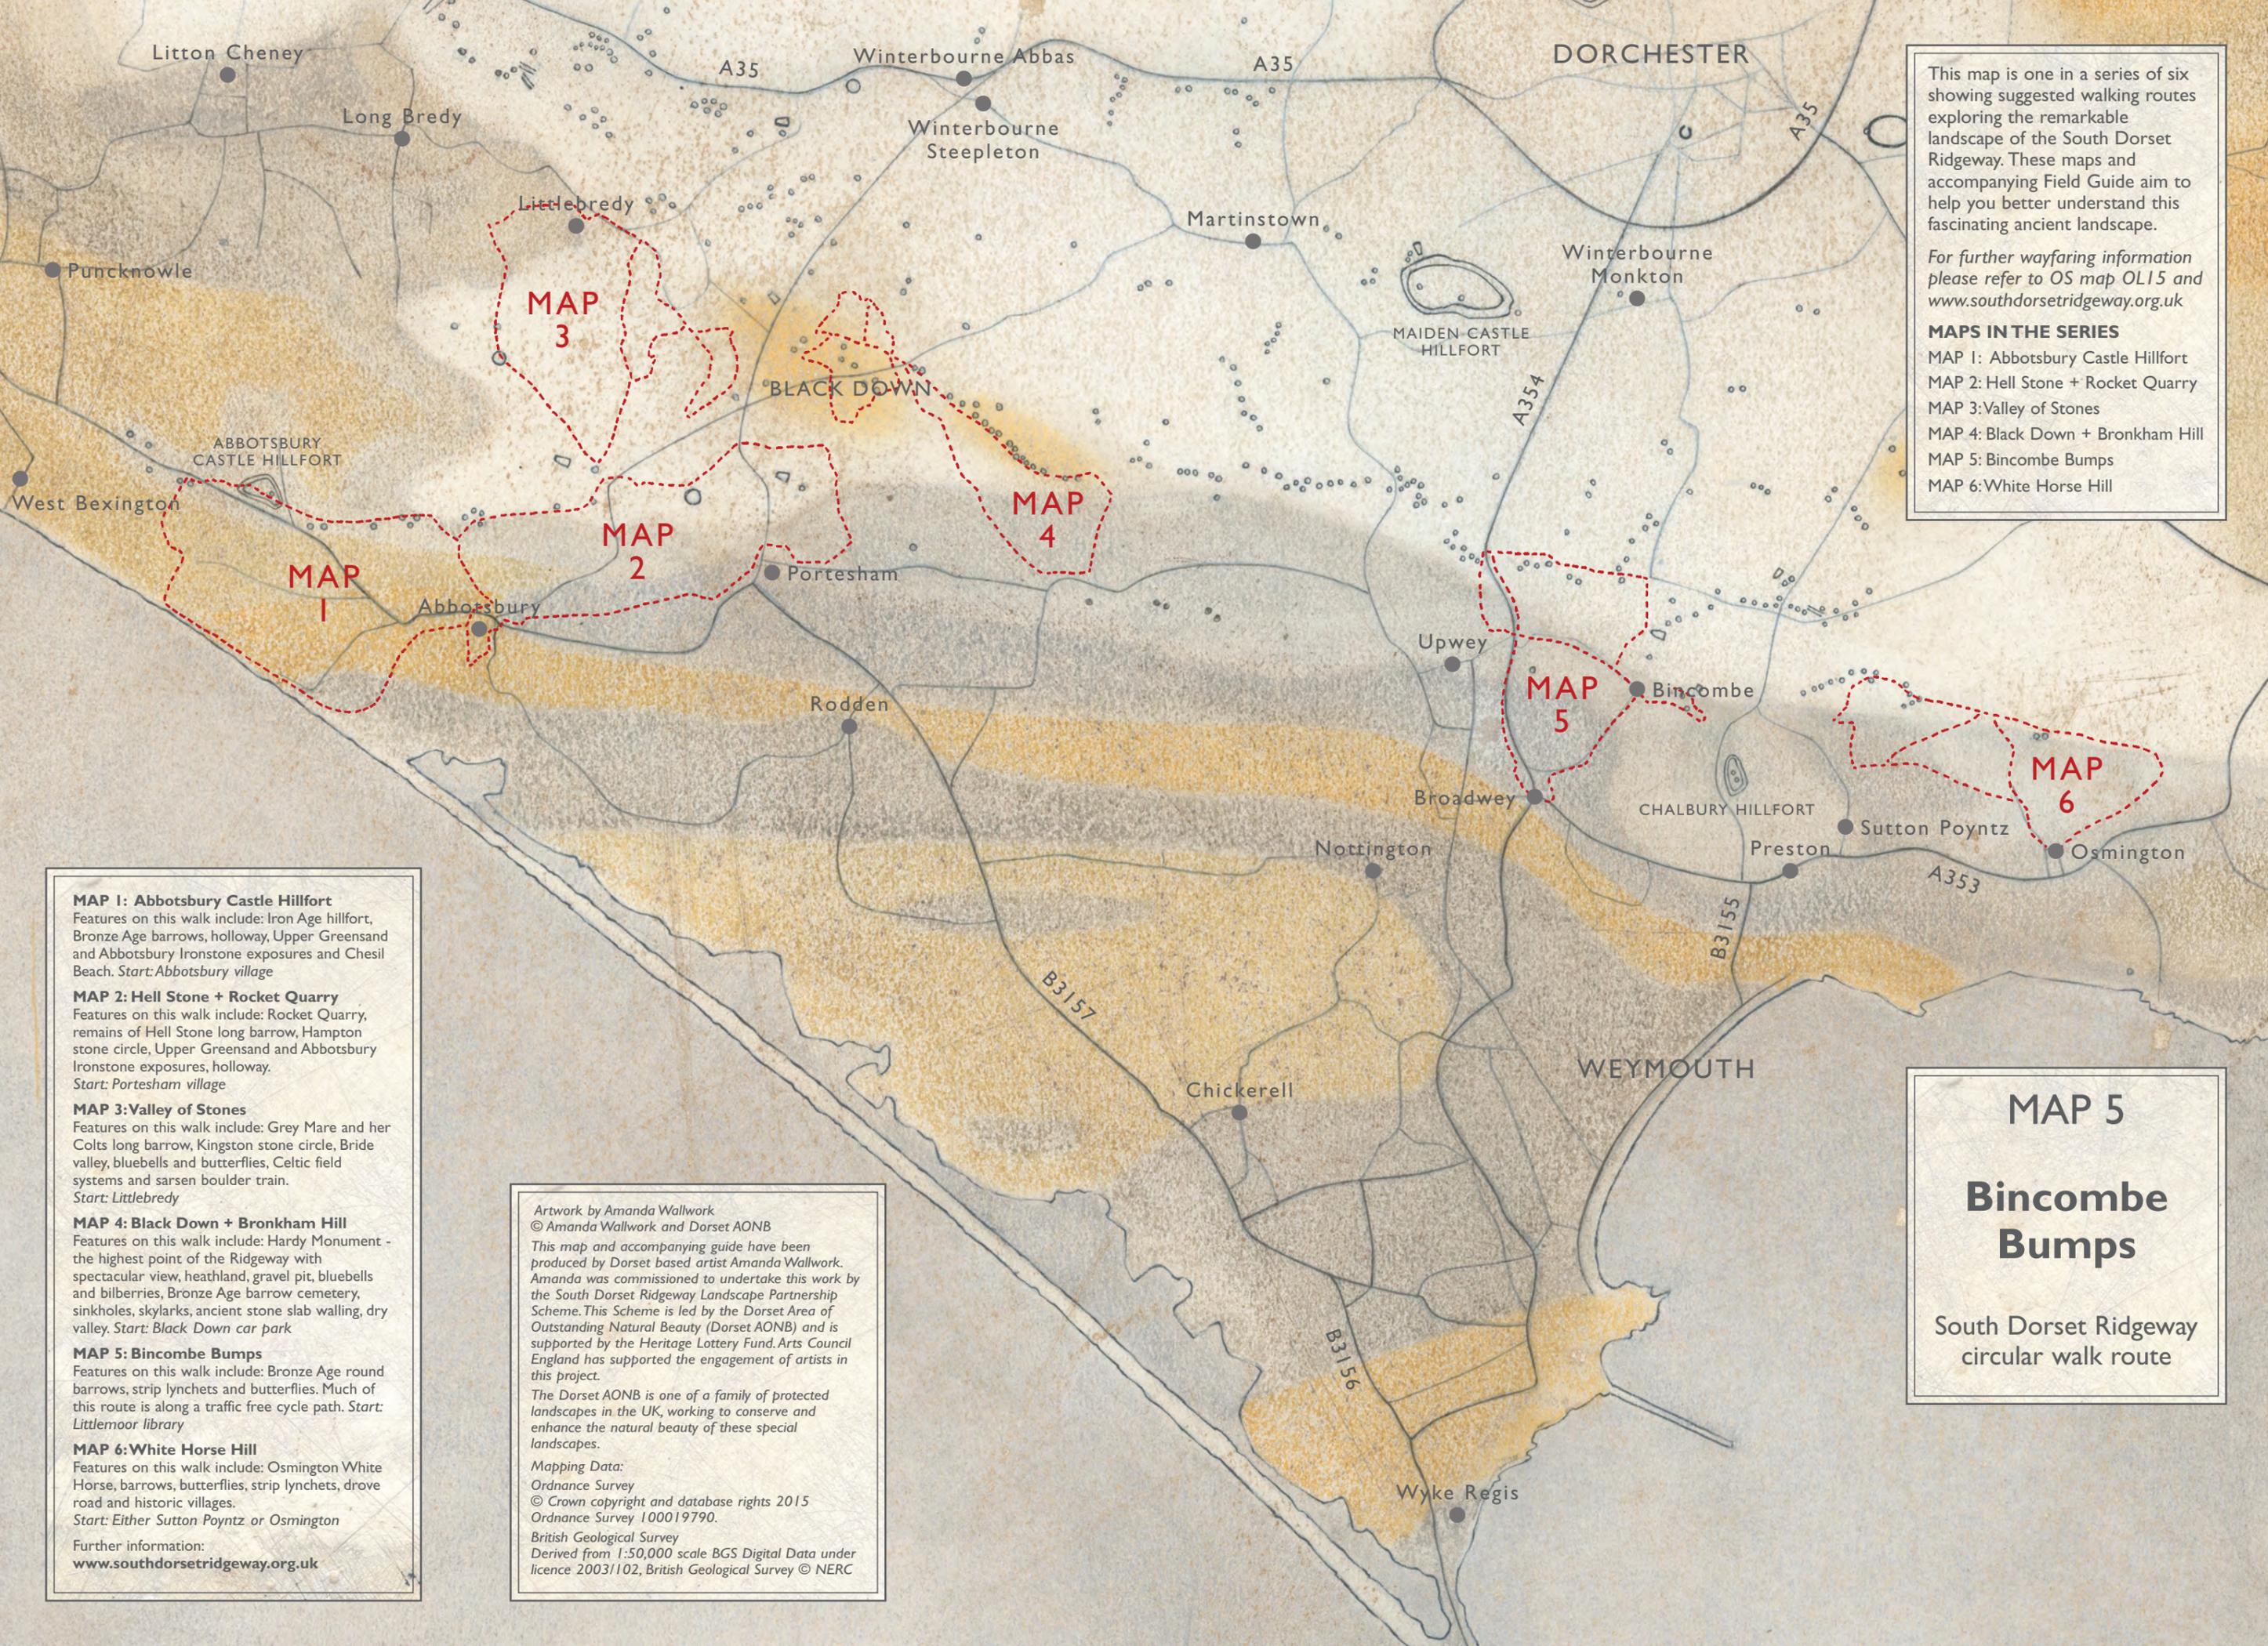

The field names on this map are taken from Tithe maps and manuscripts that were produced following the 1836 Tithe Commutation Act. These recorded the names of all owners and occupiers of land in the parish that were liable to tithes - a tax of one tenth of everything they produced.

Bronze Age Round Barrow Types: There were once thousands of barrows across the Ridgeway - only a few hundred are still visible but traces of many others remain. Their designs feature various combinations of mound, ditch and bank.
